

## Integrated System News Bulletin

### New MHSA Plans Now Available in the Integrated System

Attention: All Providers

#### STOP – Impact to You

Effective June 30, 2009 MHSA FSP and MHSA Non-FSP Plans will be terminated and claims that carry service dates greater than June 30, 2009 can not be billed to either of these two plans. IS users who select one of these inactive plans on claims after June 30<sup>th</sup> will either see their claim error (direct data entry users) or deny for rules (EDI users).

DMH has added several new MHSA Plans (see the link below to access this table) to replace these two inactive plans. These new plans are effective July 1, 2009.

#### CAUTION – What You Need to Know

Prior to these changes, tracking of expenditures was difficult due to multiple MHSA funded programs billing to the same plan. These new plans were added to allow providers and DMH to monitor expenditures according to the new subprogram schedule issued as part of the new negotiation package. These changes will also streamline our process for reporting MHSA expenditures to the state.

Based on information provided by the MHSA Implementation Unit and DMH Programs, CIOB Revenue Systems Administration staff have added the appropriate new MHSA plan(s) for each billing provider so that providers do not experience problems with billing to these new plans.

#### GO – What You Need to Do

Using the plan table (link below) enter the appropriate MHSA plan for claims with service dates greater than June 30, 2009. *Providers should continue to use MHSA FSP and MHSA Non-FSP on unbilled claims as well as resubmitted claims with service dates prior to July 1, 2009.*

Questions regarding the appropriate selection of plans, plan availability in the IS plan drop down menu (direct data entry users), or EDI denied claims (deny reason 38 rule code Inb837.Post.5.2.E3) should be directed to your lead District Chief. The lead District Chief will be responsible for initiating a PFAR to CIOB to request the plan be added.
